- **Correlation to Index.** The performance of the fund and its index may vary somewhat due to factors such as transaction costs, sample selection, and timing differences associated with additions to and deletions from the index.

The following supplements similar information under the heading "Principal Investment Risks" in the "Fund Basics" section beginning on page 6.

Correlation to Index. The performance of the fund and its index may vary somewhat due to factors such as fees and expenses of the fund, imperfect correlation between the fund's securities and those in its index, timing differences associated with additions to and deletions from the index, and changes in the shares outstanding of the component securities. The fund may not be fully invested at times, either as a result of cash flows into the fund or as a result of reserves of cash held by the fund to meet redemptions. The use of sampling techniques or futures or other derivative positions may affect the fund's ability to achieve close correlation with its index.

Effective September 1, 2011, the following information replaces the similar information found in the "Fund Management" section on page 10.

The fund's annual management fee rate is 0.045% of its average net assets.
